PROJECTS

Ignite

- **Summary:** This application helps couples stay connected by igniting meaningful conversation and providing each partner personalized ideas to make the other feel loved, based on a questionnaire that we created.
- **Role:** Create questionnaire logic via Javascript, React, UI
- **Tech Stack:** MongoDB, Express, React, Node, Bootstrap
- **Live Site:** <https://fierce-sands-31159.herokuapp.com/>

Organizarr

- **Summary:** Created with the busy student in mind. Users access a personal dashboard where they can save notes, to-do lists and create/attend study groups.
- **Role:** Project management, design, UI, model creation, client-side Javascript, Handlebars, debugging.
- **Tech Stack:** Handlebars/HTML, Bootstrap/CSS, Javascript, Express, Node, Sequelize
- **Live Site:** dry-badlands-77030.herokuapp.com/

Map-A-Test: Find a Covid Testing Site Near You

- **Summary:** Through a simple and straightforward UI, this application displays covid testing sites based on location.
- **Role:** Third party API's, form validation, UI, Javascript.
- **Tech Stack:** HTML, Javascript, jQuery, Foundation/CSS, Parsley, Google and Covid API's
- **Live Site:** lesliejpatino.github.io/find-covid-testing/
